

AUTOMATIC MULTIFUNCTION TUB

Tecno-Gaz has launched a **new and revolutionary device that automatically** performs the four major preparation phases required prior to sterilisation.

MultiSteril Fast automatically disinfects, cleans, rinses and dries. This automated process increases consistency and staff safety and significantly reduces time spent on the preparation process.

MultiSteril Fast is a unique device - indispensable to any facility that sterilises instruments.

Increase safety

No need to scrub, wash, disinfect or dry instruments by hand. MultiSteril Fast increases safety of steri-room personnel and reduces risk to the practice owner.

Ensure protocols

Sterilisation can only be achieved when instruments are prepared properly. MultiSteril Fast automatically performs each of the four processes correctly.

EN15883

Rest assured

Issued by the University of Dresden - when used in combination with MultiSteril CD Cleaner, MultiSteril Fast provides “total elimination of the bacterial load”, “residue elimination to levels below the required minimum standard” and “exceptional cleaning without damage to the instruments”.

Save space

Steri-rooms are often small, making space valuable. MultiSteril Fast is compact and requires only a small amount of bench space - 415 W X 450 D X 750 H

Save time and money

Reduce the amount of time spent on manually preparing instruments for sterilisation. Let MultiSteril Fast prepare them in just 30 minutes for about \$3.

COMPLETE CYCLE 

Technical data

Width	415 mm
Height	415 mm
Height dimensions with open lid	750 mm
Weight	20 kg
Power Supply	230v
Power consumption	1000W

Water tank dimensions

Width	332 mm
Height	120 mm
Depth	227 mm
